WHAT IF YOU COULD LAUNCH CAMPAIGNS AT YOUR TARGET MARKET DECISION MAKERS AND FILL YOUR PIPELINE FOR LESS THAN THE COST OF POSTAGE?

RAINMAKER eSEGMENT

Rainmaker aggregates data from comprehensive databases that track hundreds of thousands of companies in North America to develop your targeted e-mail, fax and tele-marketing lists.

Our consultants will work with you utilizing all of your available demographic data to define your market by Industry, SIC code, functional buyers such as CEO, VP of Sales, VP of Engineering, and CFO, geographies such as state, province or region. Upon completion we will draw upon our database sources and generate the appropriate segmented database complete with e-mail address, fax number, company address and contact information

Opt-In consumer databases are long on numbers and management requirements and short on focus and results. These lists cannot effectively target your markets forcing you to spend money marketing to the general public...rather than your targeted buyers. This approach to eMail marketing is akin to bonded direct mail houses. You must trust that the message went out to the market you desired and hope for results.
